Professional Summary

I am looking for Part Time work while I am completing my studies in Web Design/Software Development. I am dedicated, creative, and persistent, so I am looking for a role that can continue to develop these. My career goals are to be a web developer and it is important to me to find a job that can help me get the skills required to do this.

Key Skills

Problem-Solving & Critical Thinking

- Perseveres with challenges until a solution is found.
- Strong research skills to identify and apply new solutions.

Technical Proficiency

- **Languages & Tools:** HTML, CSS, JavaScript, Python (basic), Discord.js.
- Web design fundamentals, troubleshooting, data analysis (basic).
- Building and maintaining PCs, installing operating systems.

Learning & Adaptability

- Actively seeks feedback to improve work quality.
- Self-directed learning using online resources and tutorials.

Organisation & Self-Management

- Creates systems and processes for efficiency.
- Works independently with strong time management skills.

Projects *(New section — shows initiative)*

- Personal Discord Bot Development: Created interactive bots using Discord.js, integrating commands, automation, and user interface elements.
- Portfolio Website (Complete): Designing a personal portfolio site using HTML, CSS, and JavaScript to showcase development projects.
- Company Website (Complete): Designing a company website using HTML, CSS, and JavaScript to assist others in programming and development
